## CONVERTER WITH GALVANIC INSULATION

S109REG

Equipments coupling the electromagnetic compatibility prescriptions based on the 89/366/EEC directive.

Reference norms:

- EN 50081-2 Industry environment emission norm
- EN 50082-2 Industry environment immunity norm

Module signal converter with galvanic separation 3500 Volt between input and output signal made by a linear optoisolator.

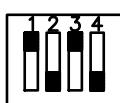

- **INPUT PREARRANGEMENT**

Input can be prearranged, by some DIP-switches on front panel, by a serie of standard precalibrated signals, or by a calibrable signal by user.

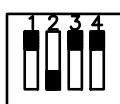

- **STANDARD INPUT SIGNALS**

Follows the prearrangement of DIP-switches for various standard precalibrated input signals:

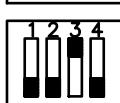

Current 0 - 20 mA

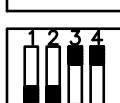

Current 4 - 20 mA

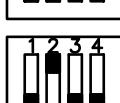

Voltage 0 - 2 Vdc

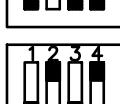

Voltage 0,4 - 2 Vdc

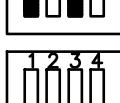

Voltage 0 - 5 Vdc

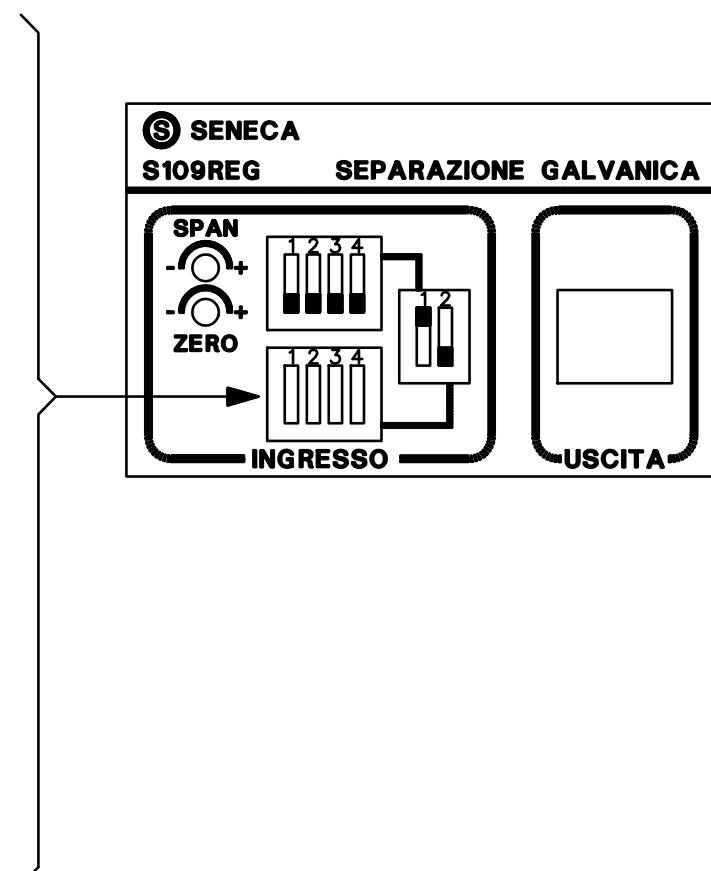

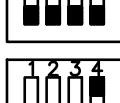

Voltage 1 - 5 Vdc

Voltage 0 - 10 Vdc

Voltage 2 - 10 Vdc

- SIGNAL THAT CAN BE CALIBRATE BY USER

Signal that can be calibrate by user must be in that range:

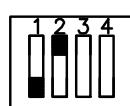

- Current : ZERO's deviation between +/- 14 mA,  
SPAN between 2 and 20 mA.
- Voltage : ZERO's deviation between +/- 7 Vdc  
SPAN between 1 and 10 Vdc.

Signal's calibration by user happen connecting a tester capacity load  
20 Vdc at test-point (clamp 1 ( - ), clamp 4 ( + ))

Giving at input signal corresponding to desired zero scale and turning ZERO trimmer till on  
tester appares 0 Vdc voltage.

Give in input signal corresponding desired full-scale and trim span till on the tester will be  
displayed 10 Vdc.

ZERO's movement  
+3 Vdc / + 7 Vdc  
+ 5,5 mA / + 14 mA

ZERO's movement  
- 4,5 Vdc / + 4,5 Vdc  
- 9 mA / + 9 mA

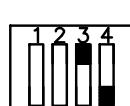

ZERO's movement  
- 7 Vdc / -3 Vdc  
-14 mA / - 5,5 mA

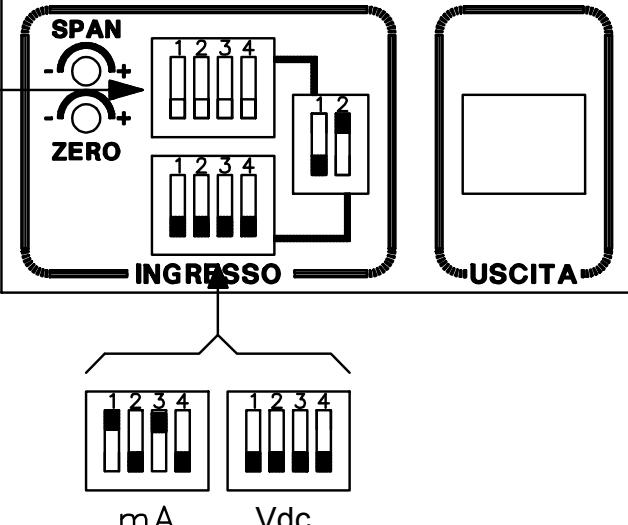

SPAN  
2 Vdc / 10 Vdc  
4 mA / 20 mA

SPAN  
1 Vdc / 2 Vdc  
2mA / 4 mA

**S SENECA**  
**S109REG** **SEPARAZIONE GALVANICA**

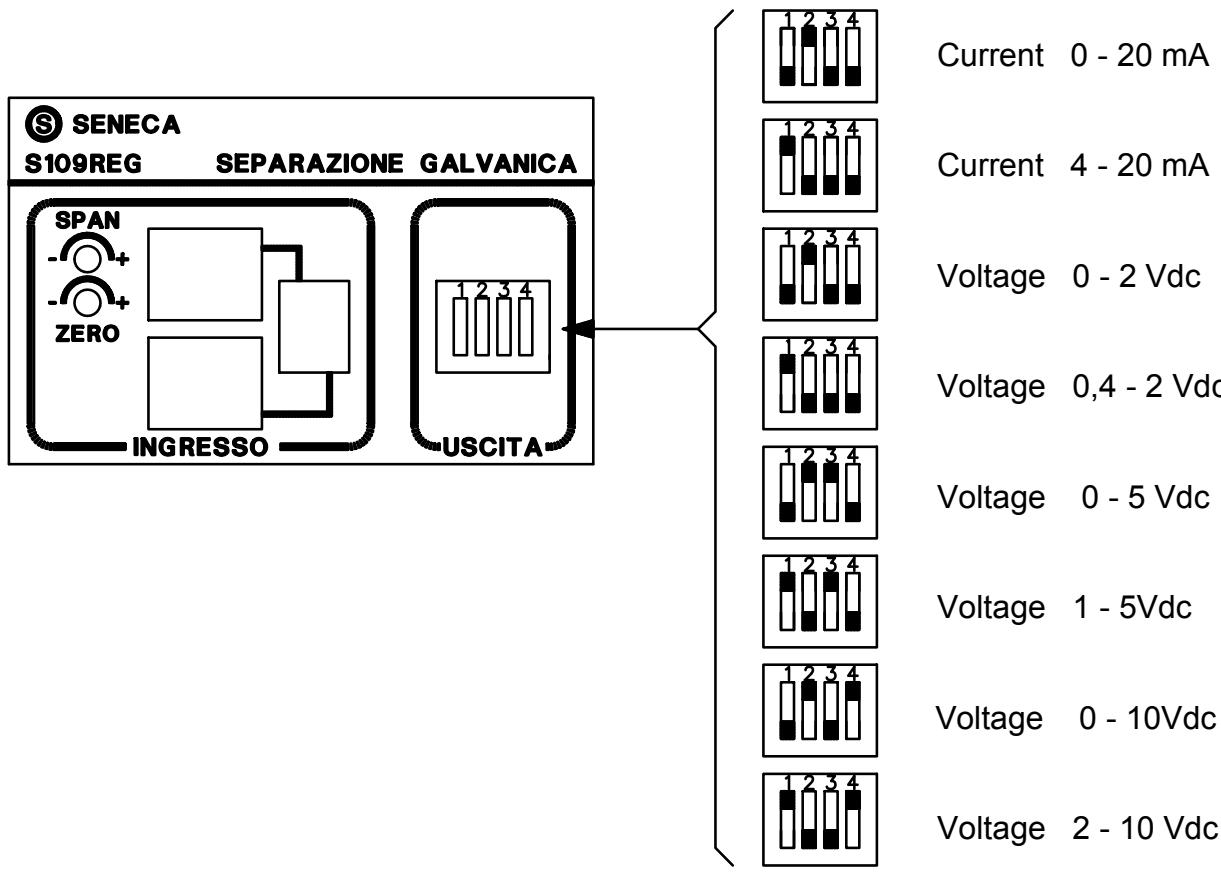

- **OUTPUT'S PREARRANGEMENT**

Output can be prearranged, by DIP-switches on front panel for serial standard prearranged signals.

- **STANDARD OUTPUTS**

DIP-switches prearrangement for various standard prearranged signals:

- **FEATURES:**

- Power	:	S109REG-1-ST      115 / 230 Vac +/- 10 % 50 / 60 Hz
- Consumption	:	1,5 VA
- Input resistance	:	100 ohm in current , 1 Mohm in Voltage
- Transmission's error	:	< 0,5 %
- Temperature's coeff.	:	+ / - 0,005% /∞C
- Isolating voltage	:	3500 Volt
- Temperature / Humidity	:	0° - +50°C / 90% at 40°C (not condensing)
- Size / Weight	:	52,5 x 95 x 69 mm / 300 g approx.

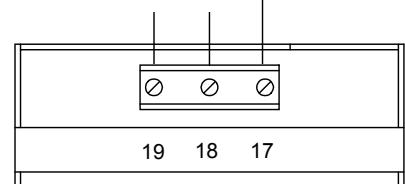

- ELECTRICAL CONNECTIONS
