

Statement of supply chain continuity and end of life of products

SENECA products and solutions have an average life cycle from 3 to 10 years with 5 years further assistance and repair from the end of production.

These values are however indicative and dependent on the medium / long-term availability of components, the updating of the technological platforms, the contractual sales and warranty conditions, the economic-functional value of the product in the context of the global installation or supply of which it is part.

PADOVA, 12/06/2018
