

2026 Price List – Effective Date

Dear Customers,

We inform you that the new **SENECA Price List** will come into force on **January 16, 2026**.

Orders placed using the current price list will be accepted until **January 15, 2026**, provided that delivery is scheduled **no later than February 28, 2026**.

As always, SENECA has worked to maintain the highest possible price stability. However, for several items whose prices have remained unchanged since 2022, a **slight price adjustment** has become necessary.

Some product categories also include **coding updates** due to new variants, technical innovations, regulatory requirements (e.g., RED, cybersecurity), and logistical optimizations.

The main adjustments, with an average increase of approximately **+3%**, apply to products such as: remote alarm units, **K** and **Z Line** converters, **S Line** indicators, **T201 Series** current transducers, **R203/R204 Series** power meters, **R** and **Z-PC Line** I/O modules, smart dataloggers and **Key** model gateways.

These changes will also be reflected in **Metel** and **e-commerce** price lists, although publication timing may vary.

The official reference for the effective date remains the **commercial price list** covered by this communication.

For information or clarifications, we remain available at **+39 049 8705359** or at **commerciale@seneca.it**.

With best regards

Roberto Mazzotti
