STRATON Editor - Security Advisory #321328

With reference to the security advisory STRATON ID #321328, published by Copadata on September 11, 2026, we report information relating to the CVE-2026-84854 vulnerability, classified HIGH with a CVSS v3.1 score of 7.0.

The vulnerability only affects the WibuKey driver for Windows version 6.71 or earlier. This driver is only required for use with the green Wibu dongles used for the STRATON Editor license.

The CodeMeter driver used with the silver dongles is not affected by the signaling.

Therefore, this policy potentially and exclusively applies to Windows workstations on which SENECA STRATON IDE or SENECA STRATON PACKAGE are installed and a green Wibu dongle is used for the relevant license. The use of a SENECA controller or RTU compatible with STRATON does not, in itself, imply exposure to the vulnerability.

Affected component	WibuKey Driver for Windows
Affected versions	Version 6.71 or earlier
Exposure condition	Windows PC with WibuKey driver installed and green Wibu dongle used for STRATON Editor license
Possible impact	System crash. Under unfavorable conditions, possible alteration of adjacent kernel memory
Unaffected components	CodeMeter driver used with silver dongle

Recommended actions

- Check the Windows Control Panel, section 'Uninstall a program', for the presence of 'WibuKey Setup'.
- If present in version 6.71 or earlier, uninstall the driver and restart your PC.
- Then install WibuKey Runtime for Windows in version 6.72 or higher, downloading it from the official Wibu website, and restart your PC again.
- If the driver is not installed or green Wibu dongles are not used, no further action is required.

While waiting for the update, STRATON recommends that you keep your PC using the WibuKey driver offline or properly protected.

Therefore, SENECA devices programmable by STRATON are not automatically affected: the verification must be performed on the individual Windows development or maintenance workstation, based on the exposure condition described above.

We remain available for any further clarifications or technical insights.
